

MATRICE 600

Mounting Guide for GPS Module

There are three mounting positions for GPS modules and one cabling slot reserved on the MATRICE™ 600 aircraft. Mount the GPS-Compass Pro module to mounting position 1 to leverage the GPS cabling slot.

The figure below shows all three mounting positions. Align the arrow marks on the GPS-Compass Pro module with the aircraft's nose direction during installation. Be sure to set the corresponding GPS mounting position values in the DJI Assistant 2 after installation is completed.
